

The Top Games

=====

20/10/26

Its impossible to create the top five, ten or even twenty of a subject as wide as videogames.

Console wars was a thing and at one point the hardware was almost more important than the games.

Atari/Commodore/Sinclair then later Sega/Nintendo all competed to be the best.

But for me it didnt matter at all, as It was all about the games, not what it was played on, so my top games are spread over all the machines I have owned.

But as this is an Atari page, I thought I would do a few 'Top' lists of my own, but weirdly they seem to resonate with other Atari 8 bit gamers. Anyway, here is my top (in no real order) games.

=====

Mountain King
Ms Pacman
M.U.L.E
Rescue on Fractalus
Star Raiders
Centipede
DigDug
Alley Kat (the Cat one not the shooter!)
Frogger
Space Taxi
Seven Cities of Gold
Stunt Car Racer
Archon
Lode Runner
Zorro
H.E.R.O
Ultima 4
Moon Patrol
Spy Vs Spy
Koronis Rift

=====

Absolutely no doubt there are others, and I am fully aware that this list is pretty generic but boy there are some amazing games for the 8bit Atari range.

This is really more a list of games that I gravitate to most of the time. They are safe and familiar and I can lose myself in one for a while when this modern life gets too loud and obnoxious.
